REMARKS

The figures of births and deaths shown in this statement for week ending the 26th May, 1956 relate to 208 towns with an estimated population of 27,395 thousands. The total number of towns is 317 and their population is 41,516 thousands. Thus 66% of the total number of towns representing 66% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 14,482 and 6,965 representing birth and death rates of 27·5 and 13·2 per thousand of population respectively.

(a) *States (Part A and C).*—The data here relate to 176 towns with an estimated population of 23,567 thousands. Information about Delhi and West Bengal could not be included. The total number of towns is 252 and their population is 33,432 thousands. Thus 70% of the total number of towns representing 70% of the total population is covered.

The number of births and deaths recorded in these towns were 12,559 and 6,217 representing birth rates and death rates of 27·7 and 13·7 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) *States (Part B).*—The data here relate to 32 towns with an estimated population of 3,828 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 49% of the total number of towns representing 47% of the total population is covered. The number of births and deaths recorded in these towns were 1,923 and 748 representing birth and death rates of 26·1 and 10·2 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
